

Hidden Options

- Maximize Message Pane -

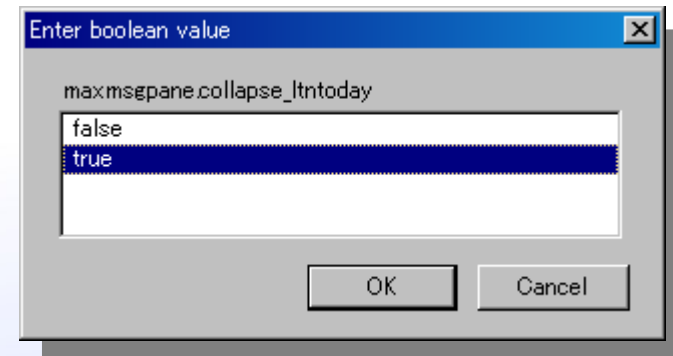

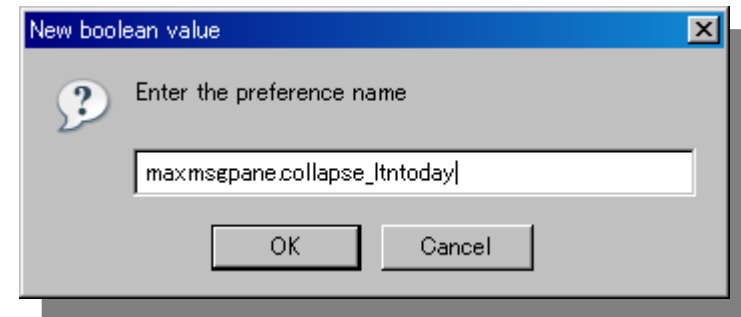

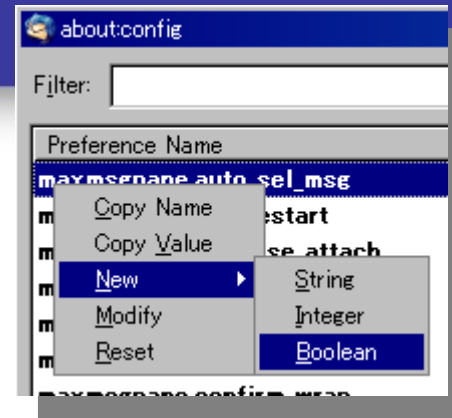

Contents

- Set up a hidden option
- Hidden options
 - Do not wrap in the Navigation Bar
 - Maximize without message selection
 - Do not maximize by left-clicking on the header view
 - Hide Lightning's "Today Pane" on maximizing

**These options are experimental.
Some may be removed in the future release.**

Set up a hidden option

1. Open Config Editor
2. Right-click and choose "New"
3. Click on the type you want to create
4. Enter an option name
5. Enter a value
6. Restart Thunderbird if needed

Do not wrap in the Navigation Bar

Option: `maxmsgpane.default_wrap`

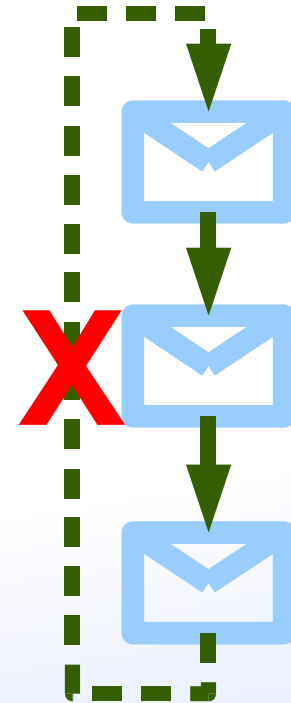

Type: boolean

Default value: true

You have 3 messages and read them by clicking on the next button on the Navigation Bar ...

Value = true

Value = false

Maximize without message selection

Option: `maxmsgpane.allow_max_wo_selection`

Type: boolean

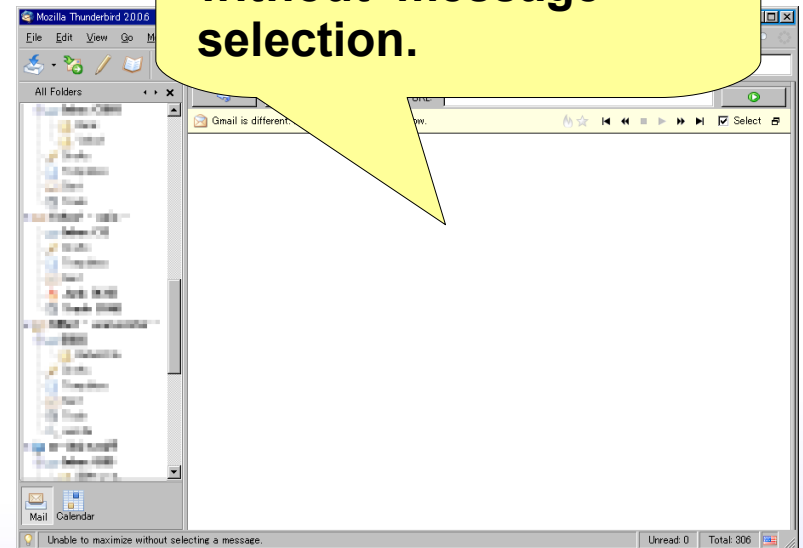

Default value: false

This message is shown in the status bar if no message is selected on maximization.

Value = false

You can maximize without message selection.

Value = true

Do not maximize by left-clicking on the header view

Option: `maxmsgpane.forbid_lmb_on_hdr`

Type: boolean

Default value: false

Left mouse button and middle mouse button are available

Value = false

Only middle mouse button are available

If you use single-clicking to toggle, I recommend you to use this mode and use single-middle-clicking to avoid to conflict with some operations: selecting text, etc...

Value = true

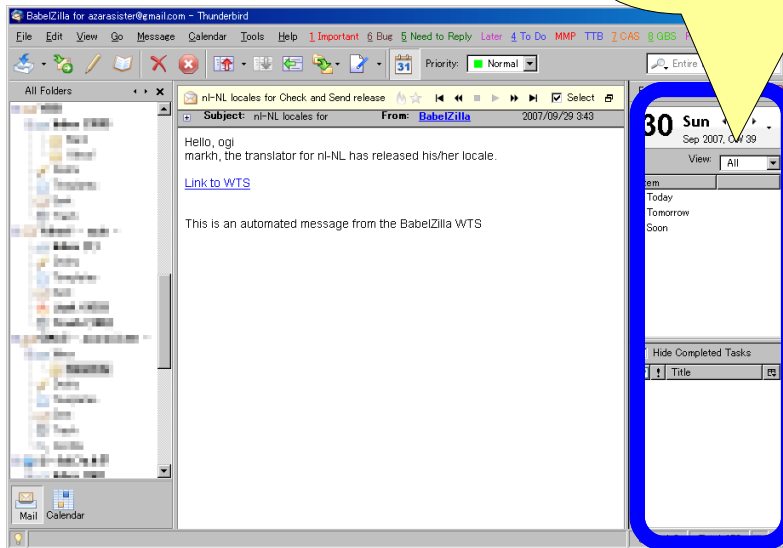

Hide Lightning's "Today Pane" on maximizing

Option: `maxmsgpane.collapse_tntoday`

Type: boolean

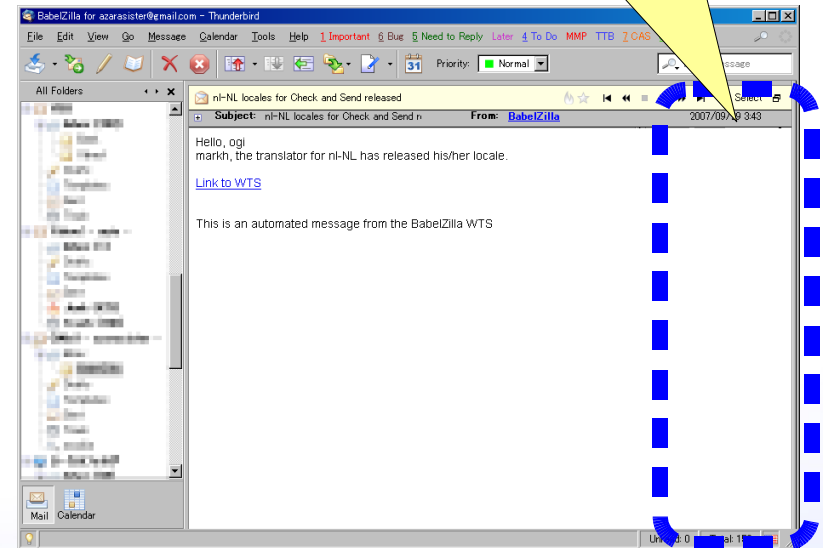

Default value: false

Today Pane is not hidden

Value = false

Today Pane is hidden too.

Value = true
